Customer Reviews

Very well written, easy to follow, lots of good pictures of construction techniques. My first bowl took only two hours - my friends at work are already ordering them for custom gifts. Watch out - you'll get hooked!

I took a class on how to make the square bowl three days ago and have been at my sewing machine ever since! The book is very easy to follow and once you get the basics down you can make any of the bowls. These make great gifts and are also a great way to use fat quarters.

This book is comprehensive. Lists everything you need and the instructions are great. If you are new to sewing like I am, take it slow and read the instructions carefully. Re-read if necessary. My bowls are improving with each new bowl I make. Those hard to buy for people will be easier with this gift idea. Have fun.

Great instructions and pictures. Way too much fun to do!! I can highly recommend this book. We made custom bowls for Christmas and filled them with goodies, everyone loved them! Five Stars!

I heard about this book at my guild and had to try it out. It's really fun. I loved all the detailed photographs that show the entire process. Try it you'll love it!!!

Linda Johansen's Fast Fun & Easy Fabric Bowls is an innovative guide to producing fabric bowls provides five bowl designs to create in the fabric and colors you choose. Tips included for creating flexible forms, interfacing materials, and special effects provide some intriguing insights into producing impressive fabric bowls which are both reversible and washable.

All the sewing lists are raving about this so I just had to get it. Wow! Whadda a concept. It's fun and easy and you just gotta be the first on your block with one. Really a cool book.

This is such a wonderful technique! It's quick and playful. A great way to use Fat Quarters, too.
